

Oregon State Ecampus online degree programs

Ecampus

Oregon State
University

Patric
from India
BS in Business Administration

Watch his story:
https://youtu.be/nTWbvj8_FM

“Studying from India was a little challenging, but also really fun, mainly because the faculty did a great job of making themselves accessible. My professors made that extra effort to actually give real-world experiences.”

About Oregon State Ecampus
Oregon State Ecampus is regarded as one of the nation’s best providers of online education for its commitment to student support and success, the expertise of the faculty who teach online, and providing high-quality learning experiences to students in more than 60 countries. Every online course is developed by the same OSU instructors who teach on campus, and you’ll earn the same OSU diploma online that on-campus students earn.

The degree you want, the support you need

Our Exclusive Advantages

Your success is our success. When you become part of INTO Oregon State University, our team will be there every step of the way to make sure you thrive academically and socially. Here are just a few highlights of what makes INTO Oregon State University Ecampus a number one choice for students from all around the world:

- Affordable tuition in comparison to face to face studies

Our Benefits

Oregon State Ecampus blends 21st century innovation with 150-plus years of institutional excellence. Everything is designed to help OSU students:

- Make an impact in their communities and beyond
- Receive unmatched support at phase of their journey
- Gain hands-on, experiential learning opportunities
- Build connections with OSU’s world-class faculty
- Enter the workforce with the skills they need to succeed

A National Leader in Online Education

Oregon State University Ecampus is among America’s best online education providers. In 2022, Oregon State’s online bachelor’s programs were ranked No. 5 in the nation by U.S. News & World Report, making it Ecampus’ eighth straight year in the top 10.

Fully online degrees.

By earning your degree 100% online with Oregon State, you can take control of your learning environment, balance your schedule and fast forward to your career. Oregon State Ecampus degree and certificate programs feature coursework that is all or nearly all delivered online. Online courses are asynchronous, meaning there are no scheduled class meeting times, and you can access courses at your convenience. Flexible academic plans help you manage the length of your studies and fits your schedule.

Graduate just like on-campus students

- All OSU Ecampus classes are developed by **the same** professors and instructors as the on-campus classes.
- You will earn the same diploma and transcript as on-campus students
- You will have access to student success coaching, free online tutoring, academic support resources, career services and more.
- All classes are fully accredited and accepted at all American universities

Build online career experience for tomorrow’s job market

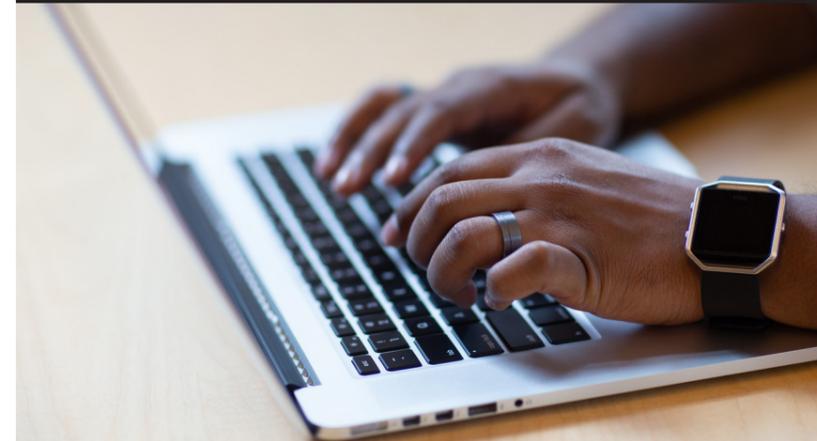

- Start your program online and transfer to campus later at any time. Once on campus, you will continue your degree with some familiar faces. Your advisors, professors and instructors you had online will be there to meet you in person.
- Spend at least three terms on campus to qualify for OPT opportunities to work in the U.S. for up to three years after graduation.
- While studying online, you’ll develop your software and digital skills for working online and with global offices.

Customized degree path

Students can start their degree online and continue on-campus. The customized degree path is highly flexible. Here are the possible examples for undergraduate and graduate students:

- **Undergraduate Examples:**
 - 1+3: 45 credits online and three years on campus.
 - 1+3: one year on campus and 135 credits online.
 - 2+2: 90 credits online and two years on campus.
- **Graduate Examples:**
 - 1+1: 15 credits online and one year on campus.
 - Note: on-campus prices are not included in this brochure and are different to the Ecampus prices.

Benefits of starting online and finishing on campus: Students can qualify for OPT if they spend their last three terms on campus. **Save \$1,000’s on cost from housing alone** for terms spent studying online. Students gain a great return on investment as on average they **make \$20,000 more** than their graduating peers from other educational institutions.

Your journey to success starts here

Undergraduate Business

Business Administration: BA/BS

The online coursework in Oregon State's business administration bachelor's program will, among other learning outcomes, provide you with an understanding of the entrepreneurial process, a background in management and organizational behavior, and the opportunity to further develop your decision-making skills through the analysis of business cases.

Business Analytics: BS

Oregon State's business analytics online bachelor's program will equip you with expertise to integrate various information technologies and demonstrate proficiency with several data analytic tools, identify opportunities, needs and constraints for data analytics within organizational contexts; and think critically about the business implications of observed data patterns and analytics inferences.

Business Information Systems: BA/BS

As a student in Oregon State's business information systems online bachelor's program, you'll engage in coursework steeped in the fundamentals of business and mixed with a focus on business technology and systems. Specific learning outcomes include analyzing and modeling the flow of information through business process; developing computer programs to support or automate business processes; applying networking concepts and technologies to support business needs; and assessing the effectiveness of IT controls.

Management: BA/BS

Oregon State's management bachelor's degree program will prepare you for leadership roles in both goods-producing and service enterprises. You'll gain theory-driven and practical knowledge for the management of systems, personal and quality. In other words, learning management from faculty in Oregon State's College of Business will help you learn how to get things done through and in collaboration with others.

Marketing: BA/BS

By exploring how human behavior impacts marketing decisions and how data can be leveraged to impact strategy, Oregon State's marketing bachelor's degree program will teach you all about the vital role marketing plays in the business enterprise. You'll not only learn the fundamental principles of marketing and market research, but you'll also dive deep into the complex world of customer behavior and marketing strategy.

Finance: BA/BS

The diverse portfolio of courses in the OSU's finance bachelor's program will help you develop your competence as a financial leader including the ability to evaluate corporate governance structures, appraise a firm's risk profile, explain the global financial environment, and know the distinct differences between the equity market, bond market and derivatives market.

Hospitality Management: BA/BS

The coursework in Oregon State's hospitality management online degree program will set you on a path toward becoming a leader, executive or owner in the hospitality industry. Specific learning outcomes include understanding the importance of outstanding guest service quality, server-guest relationships and ethics; explaining the application of technology in various hospitality industry settings; and applying strategic management principles to business operations.

Undergraduate Engineering

Computer Science: BS

The online coursework in Oregon State's online bachelor's program in computer science will immerse you in the study of algorithms and problem-solving - problems that apply to every scientific, engineering and mathematical field. By earning a computer science degree from OSU, you'll develop skills that range from programming a custom sensor board all the way up to coordinating cloud data centers full of servers.

Computer Science: BS (post-baccalaureate*)

Earn a second bachelor's degree in two years or fewer by enrolling in a post baccalaureate program in computer science. The program will expose you to computer programming fundamentals, software engineering, computer systems and networking, mobile and web development, and user interfaces - giving you a wealth of knowledge and skills that are in high demand on the global market.

For all the programs listed above, you can apply to study plans that best match your academic profile and English language level. Explore all your options at www.intostudy.com/osu/programs

***Indicates a part-time program**

Graduate Business

Master of Science in Business

When you earn your MSB online from Oregon State, you'll enter the workforce with skills that are in high demand in industries around the world. The core curriculum emphasizes foundational knowledge - including operations management, legal issues, and markets and valuation - that can be applied in any industry. On top of that, you'll select an area of focus from the following specialization options:

- **MS Business*, Finance option**

- The finance option will teach you how to apply core financial concepts and tools to address current business challenges, use quantitative methods to evaluate the trade off between risk and reward, and demonstrate an understanding of ethical challenges facing financial managers, among other topics.

- **MS Business*, Financial Analytics option**

- This option includes foundational coursework in finance, accounting and business analytics. Discover how to integrate information technologies with data science methods to extract value from data sets, and provide a comprehensive financial analysis using appropriate tools.

- **MS Business*, Marketing Insights and Analytics option**

- The marketing insights and analytics option dives into the combination of marketing insight, which gives a theoretical understanding of what drives customer behaviors, and business analytics, which provides big data analytical techniques. Learn how to incorporate customer insights and innovative problem-solving to develop marketing strategies.

- **MS Business*, Supply Chain Analytics option**

- This option is at the intersection of business analytics and supply chain and logistics management - two areas in which organizations need trained and experienced leaders. Through the use of data management and data analytics, you'll explore the characteristics of supply chains and identify value-enhancing efficiencies.

For all the programs listed above, you can apply to study plans that best match your academic profile and English language level. Explore all your options at www.intostudy.com/osu/programs
